

Nürnberg Rental Market Analysis

Data Analytics Portfolio Project – Nuremberg, Germany

Analyzed 60 apartments in Nürnberg to find average rent per qm and best value districts.

Tools: Python, Pandas, Matplotlib, Google Colab

Key Findings:

- Average rent: 16.20 €/qm (Kaltmiete)
- Most expensive: Eibach (16.82 €/qm avg)
- Best value: Gibitzenhof / Gostenhof (~14.5 €/qm)
- 65qm for 950€ = 14.61 €/qm -> Good deal (below average)

Charts:

1. Average €/qm by Stadtteil
2. Size vs Rent correlation
3. Price distribution

How to run:

1. Open `NBG-Portfolio-Final.ipynb` in Google Colab
2. Run all cells
3. Or upload your own `nuernberg.csv` from ImmoScout24 for live data

Author: Based in Nürnberg, Germany

Goal: Junior Data Analyst position in Bayern

Built as part of my learning journey - no code memorization, just 5 core moves: head(), mean(), groupby(), new column, plot()
